### STANDARD OPERATING PROCEDURES

#### Department of Public Works Water Division

Date Issued: July 6, 2021

### Hydrant Meter Assembly Rental

#### **Purpose:**

To establish a department wide standard to allow an individual or corporate entity access to the public water supply by temporary hydrant meter assembly when a standard connection is unavailable.

#### **Procedure:**

- Renter to submit a Hydrant Meter Assembly Permit Application. Applications available on-line at <https://northattleboroughma.viewpointcloud.com>
- Meter assembly and backflow are subject to availability. In the event of a drought advisory the NA Water Dept. reserves the right to recall, return or deny a meter assembly.
- Meter and backflow device (RP or DC) to be supplied by NA Water Department. Renter may choose to supply their own RP backflow device in place of utilizing a Town-owned device. If the renter chooses to use their own backflow assembly, it must be inspected and tested by NA Water Dept. prior to use.
- Meter assembly to be inspected and tested by water department staff prior to rental.
- Protection of hardware from theft, damage, freeze, etc. is the responsibility of the renter. It is the renter's responsibility to inform NAWD if any hardware is lost or stolen. If any of the Department's assembly is lost, damaged or stolen the renter shall be billed the cost to replace or repair the assembly.
- Meter assemblies to be picked up at the NA Water Dept. and returned to the NA Water Dept. by renter
- There will be an initial rental fee of \$100 (meter) and \$100 (backflow). A fee of \$100 will be applied for each additional month the meter assembly is rented (plus \$100 if backflow included).
- Rental period ends December 1 of each year. Meter assemblies shall be returned to NADPW promptly upon completion of work; however, the assembly must be returned no later than Dec 1.
- Upon return the assembly will be inspected by water department staff

## Hydrant Meter Assembly Replacement Costs

### **Meters:**

### **Replacement Cost**

¾" Meter:	\$145.00
